

DISPOSABLE CAPSULE HOOK

Capsule hooks are used for temporary support of the capsular bag during a cataract surgery when the zonules are weak or in case of subluxated lenses.

- ❖ Capsule hooks are made of Nylon with an adjustable silicon lock
- ❖ Designed such that the hook is angled to be in the plane of the anterior capsule
- ❖ Easy to get a firm and reliable grip on the rim
- ❖ Tip of the hook is rounded to prevent any accidental damage to the peripheral capsule while placing the hooks in the bag
- ❖ Round tip also provides a larger support area per hook there by reducing the number of hooks required in each surgery
- ❖ Silicon lock helps in retaining the hook in retracted position during the surgery

Packing :

Box pack of 5 Pcs., Sterile
