

INTEGRATED WIDE ANGLE VIEWING SYSTEM for FUNDUS OBSERVATION

Features

- Integrated inverter which minimizes the height of the microscope and flips away when not needed
- Ultra view non inverter optical system
- Easy to adapt with any microscope
- Excellent field of view with better stereoscopic vision
- High optical resolution with focusing mechanism to easy the focus of the retina
- Optimum rotation without retinal shift
- Uninterrupted access to surgeon at high diopter

i-WAVS
INTEGRATED WIDE ANGLE VIEWING SYSTEM

Technical data

- Microscope working distance - 175 mm or 200mm
- Front Mid field lens - for approx. 90° viewing angle
- Front Wide Angle lens - for approx. 124° viewing angle
