

Ophthalmic Microsurgical Knives

With or Without Polycarbonate Handle

- Implant - Tip Size 4.0, 5.0, 5.1, 5.2, 5.5 mm
- Phaco Slit - Tip Size 1.0, 1.2, 1.4, 1.5, 1.65, 1.8, 2.0, 2.2, 2.4, 2.5, 2.6, 2.65, 2.75, 2.8, 3.0, 3.2, 3.5, 5.2 mm
- Crescent - Bevelled Up, Bevelled Down, Double Bevelled Up, Double Bevelled Down.
- Stab Incision - 15/22/30/45 degree with restricted depth 3.0 mm to 6.0 mm in 15 degree and restricted depth 3.0 mm in 30 degree.
- MVR Angled and Straight in 19G, 20G, 21G, 22G, 23G & 24G
- Customized (Size and Style)

Indications

The device is indicated to be used for small Incision Cataract Surgical Procedures such as ECCE, Manual Phaco and Ultra Sonic Phaco Surgery of the Eye. The device is also used for corneal / scleral incisions & cutting sutures in ophthalmic surgical procedures.

Instructions for Use:

- Pick up one pouch and open from peel to open side.
- Remove pouch and pick up tray.
- Remove knife from tray without touching blade tip & edges.
- The product should be used immediately once the packing is opened.
- Dispose it after use. It should be disposed off properly as per country's regulations and disposal of medical bio waste rules.
- The user must be fully acquainted with surgical procedures and techniques.
- The product should be handled according to the norms.

Warning:

- Read instruction before use.
- Select an appropriate type of knife for each surgical purpose.
- Do not use for other purpose than ophthalmic surgery.
- Do not use a knife if it has been hit against or in contact with other parts than the eyeball.
- Do not reuse or re-sterilize. Reuse or re-sterilization could compromise seriously the structural integrity and/or might lead to damage or infection to patients.
- If it is reused, it may cause serious problems to patients such as redness in the eye, blindness and other communicable diseases.
- One must inspect and check the product before use.
- Should not be used if the packing is damaged.
