

IRRIGATING CYSTOTOMES

D 5016	25G - 0.50 X 16 MM
D 5017	27G - 0.40 X 16 MM

Description:

The Irrigating Cystotome is an essential tool in ophthalmic surgery, used to create an anterior capsule incision while providing continuous irrigation. It facilitates safe and effective cataract removal by maintaining chamber stability and preventing collapse. Made from high-quality medical-grade stainless steel, this ophthalmic disposable cannula ensures precise control, reducing trauma during capsulorhexis procedures. Its lure lock connection allows for secure attachment, preventing leakage and ensuring uninterrupted fluid irrigation during surgery.

Specification:

Product Code & Size: D 5016 (25G – 0.50 x 16mm)

Material: High-quality stainless steel

Tip Design: Curved sharp tip for precision

Sterility: Individually EO sterilized

Usage: Single-use disposable cannula

Packaging: Individually sterile-packed, Available in boxes of 50 unit
