

PERIBULBAR ANESTHESIA NEEDLES

D 5001	23G - 0.60 X 22 MM
D 5002	25G - 0.50 X 22 MM
D 5003	27G - 0.40 X 22 MM

Description:

Designed specifically for ophthalmic block techniques, the Peribulbar Anaesthesia Needle enables safe and efficient anesthetic infiltration around the orbital cavity. It is commonly used in procedures such as cataract extraction, glaucoma filtration surgery, and vitrectomy. The thin-walled stainless steel shaft supports low-resistance injection, and the blunt tip minimizes the risk of ocular perforation. Its ergonomic hub ensures firm grip and ease of manipulation. Available in multiple gauges to suit different procedural preferences.

Specification:

Product Code & Size: D 5001 (23G – 0.60 x 22mm)

Material: High-quality stainless steel

Tip Type: Thin-walled for smooth anesthetic delivery

Usage: Single-use, sterile-packed
