

SILICON TIP POLISHER

D 5051 | 27G - 0.40 X 22 MM

Description:

The Silicon Tip Polisher Cannula is a specialized ophthalmic surgical instrument used for posterior capsule polishing before IOL insertion. It features a delicate silicone tip that gently removes residual lens epithelial cells and debris from the equatorial area of the capsule.

This ensures optimal clarity and stability for the implanted intraocular lens.

Specification:

Product Code & Size: D 5051 (27G – 0.40 x 22mm)

Material: High-quality silicone tip with stainless steel body

Usage: Disposable, sterile-packed

Application: Cataract surgery, IOL implantation procedures

Packaging: individually sterile-packed, Available in boxes of 50 unit
