

LACRIMAL INTUBATION SET (DCR)

11.00 CMS

Description:

The Lacrimal Intubation Set (DCR) is an essential ophthalmic surgical device used primarily in Dacryocystorhinostomy procedures for treating blocked tear ducts. This set includes a flexible, biocompatible silicone tube, designed for safe intubation and maintenance of lacrimal drainage. With a length of 11.00 cm, it is optimized for effective placement and long-term patency of the nasolacrimal duct.

Specification:

Procedure: Dacryocystorhinostomy (DCR)

Tube Length: 11.00 cm

Tube Type: Medical-grade silicone

Use: Single-use, sterile
